Glass Handling Equipment

GTS 200mm Vacuum Suction Cup

Sturdy, pump-action vacuum suction cup suitable for smooth, flat, non-porous surfaces including stone and glass. High carrying capacity for large or heavy loads and a high degree of safety.

Key Features and Benefits

- Vacuum leakage indicator
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 80kg
Diameter : 200mm

GTS/WH-9601HP8S

GTS 200mm Vacuum Suction Cup With Alarm

Sturdy, pump-action vacuum suction cup suitable for smooth, flat, non-porous surfaces including stone and glass. High carrying capacity for large or heavy loads and a high degree of safety.

Key Features and Benefits

- Vacuum indicator and alarm
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 100kg
Diameter : 200mm

GTS/WH-9601HP8E

GTS 200mm Tri-Position Vacuum Suction Cup

Heavy-duty vacuum suction cup suitable for smooth, flat, non-porous surfaces. High carrying capacity for large or heavy loads and adjustable handle which locks into 3 positions for different lifting applications.

Key Features and Benefits

- Tri-position adjustable handle
- Centre knob to secure vacuum cup
- Includes protective carry case

Loading Capacity : 130kg
Diameter : 200mm

GTS/WH-9601H

GTS 206mm Vacuum Suction Cup

Sturdy, pump-action vacuum suction cup suitable for smooth, flat, non-porous surfaces including stone and glass. High carrying capacity for large or heavy loads and a high degree of safety.

Key Features and Benefits

- Vacuum leakage indicator
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 95kg
Diameter : 206mm

GTS/WH-9601HP8N

GTS 230mm Vacuum Suction Cup

Sturdy, pump-action vacuum suction cup suitable for smooth, flat, non-porous surfaces including stone and glass. High carrying capacity for large or heavy loads and a high degree of safety.

Key Features and Benefits

- Vacuum leakage indicator
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 120kg
Diameter : 230mm

GTS/WH-9601HP9

GTS 254mm Vacuum Suction Cup

Strong, robust, pump-action vacuum suction cup suitable for smooth, flat, non-porous surfaces including stone and glass. High carrying capacity for large or heavy loads and a high degree of safety.

Key Features and Benefits

- Vacuum leakage indicator
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 140kg
Diameter : 254mm

GTS/WH-9601HP10A

Various Glass Handling Devices

April 2019

Glass Handling Equipment

GTS 254mm Concave Vacuum Suction Cup

A strong, robust, pump-action vacuum suction cup with a concave pad designed for curved surfaces. Ideal for lifting or carrying curved architectural glass or windscreens. High carrying capacity for large or heavy loads.

Key Features and Benefits

- Vacuum leakage indicator
- Extruded lug for quick removal
- Includes protective carry case

Loading Capacity : 130kg
Diameter : 254mm

GTS/WH-9601HP10

117mm Double Suction Cup

Lightweight, double suction cup lifting device with adjustable heads, which is ideal for curved windscreens and non-porous, smooth-surfaced materials. The device is ideal for the automotive industry.

Key Features and Benefits

- Spare handles, springs and pads available
- Supplied with protective covers on pads

Loading Capacity : 35kg
Diameter : 117mm

GTS/WH-9602A

GTS 117mm ABS Double Suction Cup

An ABS plastic, double suction cup lifting device with a centre handle for easy lifting. The universal device is suitable for handling all kinds of loads with a maximum capacity of 40kg and is especially effective in handling unwieldy parts.

Key Features and Benefits

- Spare handles, springs and pads available
- Supplied with protective covers on pads

Loading Capacity : 40kg
Diameter : 117mm

GTS/WH-9602CA

123mm Double Suction Cup

Nickel-plated double suction cup with centre handle for easy lifting. Universal suction lifter suitable for handling all kinds of loads - especially effective in handling unwieldy parts.

Key Features and Benefits

- Spare handles, springs and pads available
- Supplied with protective covers on pads

Loading Capacity : 60kg
Diameter : 123mm

GTS/WH-9802

123mm Triple Suction Cup

Nickel-plated triple suction cup in a triangular formation with a common handle. Universal suction lifter suitable for handling all kinds of loads.

Key Features and Benefits

- High quality with maximum performance
- Spare handles, springs and pads available
- Supplied with protective covers on pads

Loading Capacity : 100kg
Diameter : 123mm

GTS/WH-9803
